

# Implementing Effective Foreign Body Controls

Updated: 1 July 2010

## One day \$495 inc GST

### Course Outline

This course has been designed to assist food manufacturers and processors in understanding the workings associated with foreign object detection devices and other control devices; their positives and negatives and problems to be aware of when installing, operating and monitoring these devices.

### Course Content

This covers how equipment works, what the equipment will pick up (and the limits of detection), problems to be aware of when installing and maintaining and methods of validation and verification for:

- auto check weighers, metal detectors, x-ray machines, optical scanning devices.
- magnets, sieves, washers, settling devices, pneumatic aspirators.

It also includes data relating to recalls, product withdrawals and customer complaints throughout the industry and why the management of these devices is crucial to product integrity.

Examples of specific equipment and where they are used in the food industry are also included.

### What's Included with the course fee?

Course notes, certificate of attendance, lunch and morning refreshments. The course will run from 9.00am-3.00pm.

### Who Should Attend?

Food industry personnel involved in the HACCP team, QA management, maintenance of detection devices and separators, and auditors responsible for auditing the integrity and accuracy of these devices.
